

*Assignment #5*

**Pattern to typeface**

Look for a visual *pattern* that keeps reoccurring in your everyday life. Reproduce this pattern, e. g. by a scan or photography. Make sure it is clearly visible and distinguishable, a high contrast reproduction might be helpful.

Find shapes in your pattern that can be read as letterforms. Prepare to create a full alphabet (including numbers and umlauts) out of this pattern. You may choose to create just uppercase or lowercase letters, or both.

*Draw an alphabet out of your pattern.*

Use any technique you find appropriate, anything like photocopying, tracing, scanning, digital image manipulation might be useful. Make sure your letters have a good black to white contrast, this will facilitate your work.

Reproduce and apply your alphabet plus a reproduction of your pattern to an DIN A 3 paper in portrait orientation.

You may use a computer for any step of your work. *Reproduction quality is crucial* in this assignment, take that into good consideration when choosing tools.
